## **EPILEPSY CONNECT - NETWORKING EVENT**

**18<sup>TH</sup> MAY 2022 – 16.30 to 18.30**  
**Nexus Centre, University of Leeds**

Please register for the free event at [Eventbrite](#)

Come and join Neuronostics and Epilepsy Action in an exciting networking event that brings together people from different communities including:

- people living with epilepsy or suspected epilepsy and family members involved in their care
- people in the health services involved in their care such as neurologists, neurophysiologists, epilepsy nurses and GPs
- academic and clinical researchers who study epilepsy and other neurological conditions
- businesses spanning MedTech and Healthcare Innovation
- charities and non-governmental organisations serving those with neurological conditions
- policy makers
- those involved in adoption of medical technology

This is a chance to meet people to collaborate with on new projects, trial new technologies, to listen and learn from other community members, and to have open conversations over drinks and snacks.

### **What can you expect from the event?**

- Raising awareness of epilepsy and other neurological conditions
- Building new collaborations to co-design and co-create impactful research projects
- Involvement in trialling and testing new technologies to enable better home management of epilepsy

## Agenda

16.30 Doors open - networking, open conversations, refreshments  
17.00 Short talks: Neuronostics, Epilepsy Action, and lived experience  
17.30 Networking, open conversations, refreshments  
18.30 Close

### Neuronostics

We are a medical technology company with a vision to revolutionise diagnosis and prognosis of neurological conditions

We have developed BioEP: a digital biomarker which predicts the likelihood of future epileptic seizures from apparently normal EEG data.

The technology will be used by healthcare professionals to support and expedite diagnosis of epilepsy or a non-epilepsy condition.

We are actively developing new digital biomarkers for other neurological conditions including dementia and traumatic brain injury.

### Epilepsy Action

We are the charity representing people with epilepsy, their families, friends, and those who work to support them.

Our advice and information helps people affected by epilepsy to understand the condition and take a more active role in their own care and treatment.

Our network of online and local support groups bring people with epilepsy together so they know they're not alone.

Our campaigns and research help to improve wider public understanding and bring closer the day when people with epilepsy get the respect, fairness and understanding they deserve.

If you have any questions, please get in contact with event organisers at [info@neuronostics.com](mailto:info@neuronostics.com)

**We look forward to seeing you there for an exciting event!**
